## SUMMARY

I moved to Taiwan nine years ago to study. Four years ago I obtained a bachelor's degree from Tunghai University in Political Science and International Relations. Before moving to Taiwan I trained to be an ESL at the Anglo-Mexicano in Mexico City, an institute affiliated with the British Council.

From my arrival to Taiwan to this day I have worked as an educator in a wide variety of settings, mostly at Tzu-Ming High School and the J&C cram school, but also in summer and winter camps and tutoring one-on-one.

My biggest satisfaction has come from helping my students develop an appreciation for some of my passions, scientific literacy, visual literacy and digital literacy in particular.
